Key Insights

- Movies constitute 69.6% of Netflix's catalog.
- TV-MA is the dominant maturity rating (36.4%).
- International Movies is Netflix's most common genre.
- The United States contributes the largest share of Netflix content.
- Netflix experienced rapid content expansion between 2016 and 2019.

Final Conclusion

Netflix's library is primarily movie-focused, with strong emphasis on mature audiences and international content. The platform expanded aggressively between 2016 and 2019, relying heavily on productions from the United States while gradually broadening its global content portfolio.
